*Re: Waste collection and transportation of household and similar waste on the territory of the Sofia Municipality for 2010.*

Dear Sirs,

We would like to inform you that the Sofia Municipality has allowed the direct agreement for 2010 between the companies performing business activity and private waste-transportation companies. In this so called direct agreement, the companies are exempted from that part of the waste tax, which is related to the waste collection and waste transportation of household and similar waste for **non-residential properties** by virtue of Art. 24 paragraph 6 of the *Regulation for the assessment and administering of local taxes and prices for services, provided by the Sofia Municipality*.

The procedure for the inclusion of your company is the Order of the Mayor, which will practically exempt your company from the stated part of the tax, is the following:

1. After the signing of a waste-transportation contract, our company submits it on your behalf to the "Business activities regulation" Agency **in the period from 01.10.2009 to 30.11.2009**. The prices for a single lift-up of a container by type are given in Attachment No.1 and the amount due is determined for each client individually depending on the number of transportations per month.
2. The contract shall contain the following attachments: **application form – 2 copies** /the batch number of the site is obligatory filled in/, **a certificate by the Registry agency for both of the companies** /issued no earlier than July 2009/, **a power of attorney by your Company**, with which we shall submit the documents of your behalf in the Municipality and **the permit of .A.S.A. Scheele EOOD for the performance of the activities of waste-collection and waste-transportation**.
3. **For newly built buildings** – after the issuance of Deed 16, the company has a **two-month period** during which it shall declare it in the corresponding municipality by region. After that, **within 7 /seven/ days** the waste-collection contract shall be submitted to the Municipality with the aim of reducing the waste tax, together with the following documents: **a copy of Deed 16 or a certificate for exploitation, a copy of the declaration with which it is declared in the Municipality, an application form – 2 copies** /the batch number is obligatory filled in/, **a certificate by the Registry Agency for both of the companies, a power of attorney by your Company**, with which we shall submit the documents of your

behalf in the Municipality and **the permit of .A.S.A. Scheele EOOD for the performance of the activities of waste-collection and waste-transportation.**

4. On the basis of the presented documents, **until 30 December**, the Mayor of the Sofia Municipality shall issue orders, defining the properties for which the direct agreement is permitted. Within a term of seven days after the issuance of the corresponding orders, the “Business activities regulation” Agency shall send a copy of it for proceeding in the “Revenue and administering of local fees and taxes” Agency and in the Sofia Inspectorate.

Due to the increase in the volume of the work within the Municipality of the city of Sofia, as a result of the conclusion of the contract with subject *“Collection and transportation of household waste, supply, positioning and maintenance of household waste containers; summer and winter cleaning of streets and other places for public use on the territory of the “Oborishte” region”*, parallel to the waste collection and transportation of household and similar waste, **we offer to your attention additional services and prices for them, given in Attachment No. 1 to the present Offer.**
